

# A Message

## FROM THE PRESIDENT

---

Members of the NYC Chapter,

I would like to take this opportunity to wish everyone a Happy and Healthy New Year!

I hope everyone has gotten a chance to take some time off and spend it friends and family this holiday season.

The Holiday Party was held on Wednesday December 4th at the Tailor Public House. Thank you to everyone that RSVPed ahead of time. I'm sure you were able to appreciate the expedited entry process this year! There were over 150 people who attended. See pages 40 and 41 for some pictures from the party.

The ASPE 2025 ASSE 6060 Workshop will be held March 20-23 in Rosemont (Chicago), Illinois, registration will open soon.

Every two years we hold elections for the board of the NYC chapter. The next election will be in June 2025, for the 2025-2027 board. You do not have to be an existing board member to run for a position. The board provides a suggested roster for each position but there are write-ins for each role. If you are interested, please contact a current board member. We are also looking for individuals who are interested in being involved as ASPE Young Professional's (AYP), which is an appointed liaison position. If you are interested please contact a current board member.

Every two years we hold a Plumbing and Fire Protection Exposition in the Spring. We will providing more information on this event that will be held this spring! Past information from 2023 can be found here: [https://aspenyc.org/Plumbing\\_Fire\\_Protection\\_Exposition](https://aspenyc.org/Plumbing_Fire_Protection_Exposition)

Save the date for the 2025 ASPE Tech Symposium, which will be held in Orlando, FL September 24-28. For more information please check out: <https://aspe.org/2025-aspe-tech-symposium/>

Best Regards,  
Robb Risani, P.E., CPD

## GROHSAFE 3.0 PRESSURE BALANCE VALVE WITH INTEGRATED DIVERTER

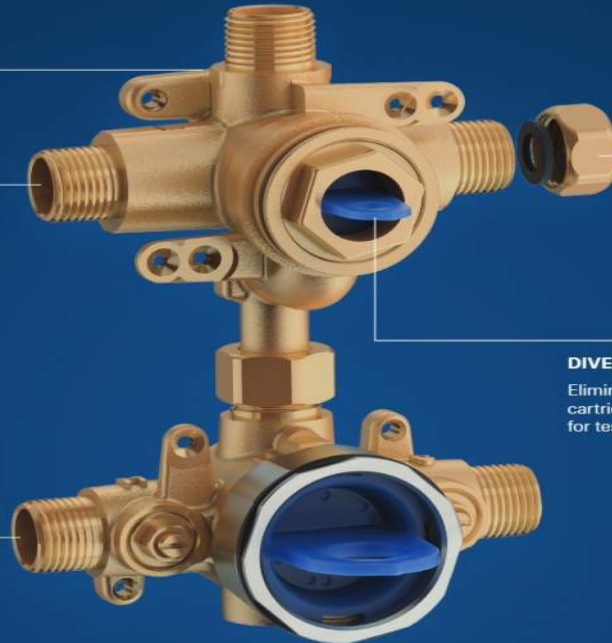

new

### FLAT BACK

Easy & solid installation allows the valve to be mounted flush with the cross brace

### ALIGNED INLETS & OUTLETS

Eliminates potential for misaligned piping & rough-in mistakes from different cross brace depths

### 2-WAY & 3-WAY CONVERTIBLE

Use same valve body for both 2-way & 3-way applications

### DIVERTER TEST CAP

Eliminates need to remove cartridge during installation for testing & flushing lines

### DynaClean Wiper Spring

DYNACLEAN, our exclusive, self-cleaning technology, cleans the refill orifice with every flush, and helps prevent valve run-on. The integral wiper spring keeps the orifice clear of debris and mineral build-up for improved performance and less maintenance.

### EvoLast Diaphragm

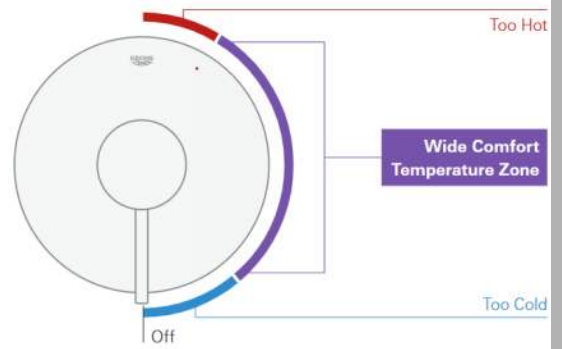

EVOLAST, a premium, chlorine-resistant diaphragm material delivers consistent performance and resists premature deterioration and failure.

### EASY RETROFIT, ENHANCED PERFORMANCE

Ultima Flush Valves are easy to retrofit in place of most popular piston and diaphragm flush valves. The industry standard rough-in dimensions allow for an easy switch.

Ultima Diaphragm Assemblies can be installed in diaphragm flush valves from other major manufacturers, making it easy to improve performance and ensure reliability in existing applications.

## Temperature Control AND High Temperature Safeguard! "... And the two shall be as ONE."

A safe, reliable hot water system is a marriage between mechanical components and a control system with built-in safeguard protection. The ETV-Plus includes everything you need:

- 3-Way Stainless Steel Electronic Tempering Valve and Actuator that meets the California lead-free standards.
- Temperature Monitoring Control- High Temperature Safeguard with Solenoid Valve
- Remote Communication capability via Internet or BACnet

### Safety that Endures

When the mixing valve sensor detects an overly high supply water temperature, the ETV-Plus signals the solenoid valve located in the hot water supply line to close, shutting off hot water supply to the system. It also triggers an alarm to notify personal and enacts a manual reset requirement so that the valve will not re-open until the problem is resolved.

With remote communications capability (via the Internet or BACnet) these alarms and other control points can be seen and accessed via the internet or an energy Management System.

These interactive components build a foundation for long-term safety.

### WHY MPAV/PALL FILTRATION SYSTEMS?

#### Simple, Compact, Durable Low-Cost Design

The MPAV/Pall filter housing design is extremely compact with no internal moving parts and nothing to fail other than replacing the cover gasket seal every few years.

#### Adjustable Filter Rating

The Pall filter rating can be easily adjusted (either finer or coarser) by installing elements with a different micron removal rating after each routine disposable filter element change-out.

#### Predictable Filtration Performance

MPAV/Pall filter cartridges have a known single-pass micron particle size removal rating that does not change while in service because they use a depth style filter media that is effective at capturing particles in a single-pass no matter their shape, unlike mesh strainer filter designs.

#### Minimizes Bacteria Growth

When Pall elements are changed every few months the housing can be easily flushed out, cleaned, and disinfected to eliminate any sludge deposits where bacteria can grow.

#### APPLICATIONS.

- New construction or retrofit applications
- High flow and low flow applications
- Incoming city water and domestic hot water systems
- Filters sized to limit clean pressure drop to <2 psid

# The Commercial Choice for Consistent Water Pressure

At Emmons Metro with the support of Metropolitan Industries, we specialize in crafting single-source water pumping solutions that meet the unique specifications of each project. Our expertise in water movement and management extends from municipal water and wastewater systems to commercial plumbing and mechanical processes.

## Pressure Booster Systems with Integrated Controls

Our custom-engineered pre-packaged pressure booster systems are the ultimate solution for businesses seeking to enhance water pressure. Whether you're dealing with insufficient main-line pressure, long pipeline distances, or elevation challenges, our systems deliver the extra boost you need. With hydraulic performances ranging from 5 to 10,000+ GPM and pressure boosts from 20 to 200+ PSI, we tailor each solution to your precise specifications. Our systems come equipped with the MetroTech III, our own manufactured controller, ensuring complete control and efficiency. These systems come pre-tested, certified, and ready to install, minimizing project lead times and maximizing system uptime. Proudly backed by a service and support team that ensures every client experiences seamless operations and unparalleled assistance, anytime and anywhere.

# PROUDLY PROVIDING THERMOSTATIC BALANCING SOLUTIONS FOR OVER 10 YEARS

## Hot Water Recirculation

In 2012, CircuitSolver® was developed to conquer the challenges inherent to conventional manual balancing valves. As the market's first **thermostatic balancing valves** used for domestic hot water recirculation, CircuitSolver® balances a system based solely on temperature as opposed to pressure or flow to guarantee hot water at **every fixture**. Dynamically balancing a system, CircuitSolver® ultimately **ended complaints** about the lack of hot water, and eliminated balancing processes and callbacks.

## Cold Water Recirculation

Last year, we implemented our thermal actuator technology into the CircuitSolver® Union Cold Water balancing valves. These valves are installed in domestic Cold Water recirculation systems to mitigate the risk of Legionella and other bacterial growth. Cold water recirculation is becoming more prominent in hospitals to reduce water stagnation and ensure residual chlorine is distributed but can be beneficial to any commercial building that could experience periods of low flow or non-use.

# YOUR COMMERCIAL SPEC JUST GOT EASIER

Specifiers know they can count on our **ElectriFLEX Series™** for a vast array of commercial solutions. It gives you the flexibility to meet every one of your customer's installation requirements.

- Features our exclusive Vitraglas® tank lining with Microban® antimicrobial technology
- Converts easily to the right voltage, phase, and kW input to meet your application demands
- Field-convertible at the supply house or in the field by a qualified installer using a conversion kit
- Light, Medium, and Heavy-Duty models available: a single model solves multiple installation requirements

Check out our **Specifying & Cross Reference Tools!**

Microban® antimicrobial product protection helps prevent the growth of bacteria, mold and mildew that may affect the product. The built-in antimicrobial properties do not protect users or others from disease-causing organisms. Microban® is a registered trademark of Microban Products Company. ©2024, Bradford White Corporation. All rights reserved.

When you need a wastewater treatment system to comply with governmental mandates and prevent pollutants from entering the water supply, you need a cost-effective, reliable solution that fits perfectly with the size and shape constraints of your design. That's often impossible with off-the-shelf solutions.

At T&C, we thrive on the challenge of designing and manufacturing water control systems that operate perfectly, in any size and shape. Our designers work with contractors and engineers to develop seamless tanks and solutions that meet the exact needs of the end user, without blowing up your budget or timetable.

is a proud supporter of

# American Society of Plumbing Engineers NEW YORK CITY CHAPTER

## PLUMBING TECHNOLOGIES

- Domestic water booster packages
- Direct inline pump systems
- Expansion tanks and air separators
- Gasketed and brazed heat exchangers
- Heat pump water heaters
- Rainwater harvesting
- Self cleaning screen filters
- Submersible sewage pumps
- Tanks, valves and other specialties
- Wastewater energy recovery

# Top Mount Sensor Flush Valves With Hydropower

Low Maintenance, Greater Sustainability

ZER6000AV-HYD

ZER6003AV-HYD

### Reliable, Sustainable Performance

Hydro•X Power® technology delivers reliable, sustainable performance by providing renewable, uninterrupted hydropower for no unplanned downtime.

### Low Maintenance

Uses EZ Gear technology, a solenoid-free, gear-driven ceramic cartridge that is less susceptible to debris and buildup for less maintenance. It outlasts and outperforms solenoids.

### Industry-leading Diaphragm

Triple-filtered AquaVantage® diaphragm, gaskets and seals are made of chemical-resistant thermoplastic elastomer, which lasts 8-10 times longer than traditional rubber.

### Sensor Activated

Automatic, touchless sensor activation reduces guest visits without a flush and can help reduce germ transmission.

### On-demand Flushing

A discreetly positioned true mechanical manual override button enables users to flush on demand.

### Standard 24-hour Line Flushing

Optional setting helps minimize stagnation and maintain fixture trap seals to protect against sewer gases during periods of inactivity.

# Our Tradition of Excellence Continues

YESTERDAY, TODAY—AND ALWAYS

Generations of loyal customers have relied on Holby Valve for superior products that are made to last.

**For 90 years, our high-performance tempering valve has been the gold standard in our industry.**

Now, our latest product—the HolbyMonitor—continues this tradition of trust and value.

This tech-savvy temperature tracking device delivers invaluable water temperature information so that you can act quickly and decisively when problems arise. You'll have the data in an instant, wherever you are.

Thanks to our commitment to quality, dependability and customer satisfaction, you can rely on the Holby Valve and HolbyMonitor to meet your tempered water needs.

## CODE CORNER

Dear NYC ASPE Members,

Hopefully by now you've had a chance a drop by the Code Corner to see what its about. In case you haven't, this is a place to get an update into what's happening with discussions of the plumbing code committee. You have an opportunity to participate, NYC ASPE members can email me their concerns regarding particular code sections and the associated language which they believe needs to be discussed during code committee meetings.

Best Regards, Vinny Rotoli

# PHX & PUMP LIFT STATIONS

Engineered for purity, built for performance

## phx

- Turn-Key & Ready to Use pH Systems:  
Pre-engineered for quick installation and operation.
- Durable Design:  
Built with NEMA 4X enclosures and corrosion-resistant materials.
- Compact & Efficient:  
Space-saving design with reliable pH control for any operation.
- Proven & Guaranteed:  
40+ years of success with a 1-year component replacement warranty.
- Safe & Flexible:  
Custom alarms, chemical containment, and advanced control options.

## Pump Lift Stations

Standard Systems:

Ready-to-ship solutions for areas without gravity drainage.

- Simplex (single pump) and Duplex (dual pump) options.
- Corrosion-resistant, temperature-tolerant, with automatic On/Off.
- Custom Solutions:

Tailored for your needs.

- Flow rates: 1-1,000+ GPM, tanks: 5-15,000 gallons.
- Advanced controls, leak detection, and multiple pump types.
