## ASPE NEW YORK CITY CHAPTER

PO BOX 293, GRAND CENTRAL STATION, NY, NY 10163

<http://www.aspenyc.org>

## SEPTEMBER MEETING INFORMATION

Topic: Domestic Hot Water Recirculation & Balancing

Speaker: Cody Mack

Sponser: Wallace Eannace

\*\*\*PDH Credits Provided\*\*\*

Date: September 2nd, 2026

Location: The Tailor Public House & Kitchen - 505 8th Avenue

Time: Dinner Served: 5:30pm

Technical: 5:30-6:30pm

Social: 6:30-8:00pm

**If you wish to receive only digital copies of the newsletter please email [nycaspenewsletter@gmail.com](mailto:nycaspenewsletter@gmail.com).**

The ASPE NEWS is a publication of the New York City Chapter of the American Society of Plumbing Engineers. The Society or Chapter assumes no responsibility for any advertisements, statements by any officer or member which may be construed as an approval or disapproval, or official position of the Society, of the material contained herein. Local Chapters are not authorized to speak for the Society.

# A Message

## FROM THE PRESIDENT

My fellow ASPE NYC Members,

I hope you and your loved ones have weathered the literal storms in our area recently, as heat waves and heavy rain have been abundant these days. While our regular meetings are on pause for the summer, we're issuing a special edition of our newsletter to remind everyone of some exciting events taking place in the next few months.

Coming up on Monday, August 10<sup>th</sup>, we have the Edmund D. Wallace Memorial ASSE/ASPE Joint Golf Classic. There is a player cap of 128 golfers, so be sure to email Eric Sawinski [eric.sawinski@wsp.com](mailto:eric.sawinski@wsp.com) to RSVP! Please also reach out to Eric for any donations of raffle prizes. These are greatly appreciated to help everyone have a good time, especially those of us with less luck on the golf course!

Later this fall, ASPE will be heading to Oklahoma City for our bi-annual Convention and Expo! **Registration is now open** for the event, which runs from October 9<sup>th</sup> to 14<sup>th</sup>. The Convention is a great way for members to learn about products in the industry, network with peers, and earn CEUs. Visit <https://expo.aspe.org/> for more information!

As our chapter continues to host appealing events and AI becomes more advanced, it's important to stay vigilant of phishing scams and remember the contact information for our board. **Board members will only reach out to you via the emails/phones listed on the cover sheet**, and official chapter communications will only come from [ny.aspe@gmail.com](mailto:ny.aspe@gmail.com), [nycaspenewsletter@gmail.com](mailto:nycaspenewsletter@gmail.com), or [postmaster@mg.aspenyc.org](mailto:postmaster@mg.aspenyc.org). We are thankful to have such an engaged chapter, and we appreciate your diligence to keep it safe!

Wishing everyone a continued happy & healthy summer, and we look forward to seeing you at our first Chapter meeting on September 2<sup>nd</sup>!

Yours in ASPE,  
Sean Mooney, CPD

# EDMUND D. WALLACE MEMORIAL ASSE/ASPE JOINT GOLF CLASSIC

MONDAY, AUGUST 10, 2026

HAMLET WIND WATCH  
GOLF CLUB  
1715 VANDERBILT MOTOR PKWY  
HAUPPAUGE, N.Y. 11788  
TEL: 631-232-9850

# NEW YORK CAST IRON CITY

Thanks for turning to black and red for decades. We're proud to be part of your incredible city. Without you, NYC wouldn't be the same, and neither would we.

**CHARLOTTE**  
PIPE AND FOUNDRY COMPANY

## **Announcement to the Engineering, Contractor and Plumbing & HVAC Professionals**

### **About Us**

Since 1981 -Bart Terroni Sr. founded the B.J.Terroni Co and opened its doors as Manufacturer's Representative in our 1,700 Sq.ft office in Andalusia, Pa.

Today, the company is operating as the Third Generation, Family-Owned business under Bart Terroni Jr and Chris Terroni, now over 45 employees Strong and the company is now located in Bensalem, Pa housed in (2) Newly Renovated 18,000 Sq.Ft facilities. Our Building features a training center with a "Live Fire" equipment Lab. We are specifically designed to educate the industry in total system operations and promote System solutions that we can provide.

**We are excited to announce that B.J. Terroni is now the Specifications Representative for Nupi Americas, Inc** – A North American Subsidiary of Nupi Industrie Italiane, S.p.A a Globally Recognized Leader and Innovator in Thermoplastic Piping systems with of your 50 Years experience. For 25 Years, Nupi Americas, we have been a market leader in PP-RCT piping system for commercial and industrial Applications as well as dual Containment piping systems.

**Our Territory:** consisting of New York City Metro area, Westchester County, Rockland County, Long Island- Nassau and Suffolk County and North Jersey.

For all your needs about Nupi Niron PP-RCT Piping Systems – Please don't hesitate to contact **BJ Terroni Company, Inc @ [NUPI-NYNJ@bjterroni.com](mailto:NUPI-NYNJ@bjterroni.com)**

***Let us know, let's get together for Lunch N Learn or Teams"***

Our team Dedicated for Nupi Niron as follows:

**Sean Conner**, Commercial Sales Manager – [sean.conner@bjterroni.com](mailto:sean.conner@bjterroni.com)

**Wayne Warren**, Commercial/Applied Products – [wayne.warren@bjterroni.com](mailto:wayne.warren@bjterroni.com)

**R.Paul Silvestre**, FASPE – Commercial Plumbing/Heating Specialist - [paul.silvestre@bjterroni.com](mailto:paul.silvestre@bjterroni.com)

**FRANK  
SMITH**

Business Development Manager,  
Commercial/Mechanical — Metro NY

## BUILT FROM THE TRADE. BACKED BY VICTAULIC.

Frank began working in his family's plumbing business at age 10, which sparked a lifelong career in piping systems and mechanical infrastructure.

Since 2016, he has partnered with engineers and design professionals to support pipe, valve, and fitting specifications—guiding product selection decisions, solving technical challenges, and moving designs from concept through construction.

Since joining Victaulic in December 2025, Frank continues to collaborate with engineers, developers, and building owners to deliver innovative piping solutions backed by technical expertise.

Have a question or need specification support? Get in touch.

## Temperature Control AND High Temperature Safeguard! "... And the two shall be as ONE."

A safe, reliable hot water system is a marriage between mechanical components and a control system with built-in safeguard protection. The ETV-Plus includes everything you need:

- 3-Way Stainless Steel Electronic Tempering Valve and Actuator that meets the California lead-free standards.
- Temperature Monitoring Control- High Temperature Safeguard with Solenoid Valve
- Remote Communication capability via Internet or BACnet

### Safety that Endures

When the mixing valve sensor detects an overly high supply water temperature, the ETV-Plus signals the solenoid valve located in the hot water supply line to close, shutting off hot water supply to the system. It also triggers an alarm to notify personal and enacts a manual reset requirement so that the valve will not re-open until the problem is resolved.

With remote communications capability (via the Internet or BACnet) these alarms and other control points can be seen and accessed via the internet or an energy Management System.

These interactive components build a foundation for long-term safety.

### **VSF300 Explosion-Proof Intelligent Video Flame Detector**

Detects an n-heptane (gasoline) fire at 200' and JP4 (kerosene-gasoline blend jet fuel) at 300'.

### **VSF303 UV/IR Flame Detector**

Responds to hydrocarbon liquid fuel and gas fires at 128' in under 5 seconds.

### **VSF301 Explosion-Proof Visual Flame Detector**

Processes live video images to detect the characteristic properties of flames visually.

### **VSF303 Explosion-Proof Multi-Spectrum IR Flame Detector**

Detects a hydrocarbon liquid fuel and gas fires at 200' within five seconds.

### **VSF303H Multi-Spectrum IR Flame Detector**

Responds to hydrogen fires at 131' with an average response time of only two to five seconds.

### **VSF3008 Flame Simulator**

Produces a unique flame pattern recognized by the VSF30X product line. The detectors in turn initiate a full alarm function.

## **Intelligent optical flame detection**

Our portfolio of intelligent flame detectors are embedded with cutting-edge technology, ensuring rapid and accurate responses to fire threats while minimizing false alarms. These detectors are designed to protect high-risk environments, including aircraft hangars, oil and gas facilities and other hazardous settings.

# On-Demand Pollution Solutions

On-Demand Products for Automatically Diverting Wash Water to Sewer and Rainwater to the Storm Drain.

## WDS-WDTS4x4CW

Trash can washout is no longer a polluting problem. Simply place the inverted trash can on the cast iron grate, turn on the water and like a flash, the trash can is clean.

The wash area is also clean because the pit-mounted diversion valve automatically opens with water use, diverting contaminated trash can wash water to the sewer. Stormwater goes to the storm drain when the diversion valve is closed.

## WDS-BDPSWTS

Engineered for outdoor showers that require separation between wash water and rainwater. The Beach, Deck and Pool Shower System offers a seamless solution, where wash water is efficiently diverted to the sewer system, ensuring that soaps, shampoos, suntan lotion, and other contaminants are properly processed.

Simultaneously, it diverts rainwater to the storm drain, preventing any cross-contamination.

**Against Defects in Materials or Workmanship**

## Automatically send washwater to sewer and clean water to storm drain

**Treat Washwater NOT Clean Rain Water**

THE BOLD LOOK  
OF **KOHLER**®

## Tend® Integrated Touchless Urinal

Designed to deliver a **more cost effective solution**. Touchless urinals with integrated flush valve provides the cleaner lines and look of a rear spud urinal with the easy valve access of a top spud. Available in 0.125 and 0.5 gpf options.

### Flexible Install & Maintenance

- Designed for high traffic restrooms, yet fully functional for man caves and other residential spaces too
- Fewer overall plumbing connections
- Includes supply connection, making install easy for both commercial and residential applications.
- Tank cover and cover locks provide vandal protection.

### Clean Space, Clean You

- Touchless valve utilizes an integrated sensor to drive a dependable flush.
- Washout design fully rinses the urinal with each flush for a cleaner fixture.
- Patented backwall geometry and extended rim, limit splash-back for a cleaner restroom and user experience.
- Includes stainless steel low-profile strainer for faster drain flow.
- Smooth contours make cleaning fixture fast and easy.

# SMART CONTROL SOLUTIONS

to keep your building running efficiently

**Emmons  
Metro LLC**

## Ion IntelliPump

An advanced pump controller with LED display accessibility. Its multi pump configurations and pump up/pump down capabilities allow for use in multiple pumping applications. Integrates with either standard floats, mechanical alternator or Ion® sensors.

## IntelliOil

Detects when oil is present within a sump pit application. Equipped with audible alarms and display alerts to help crews understand the problem situation. Works in normal (water only) conditions, operating pumps based on high or low water levels.

## MetroMix

Maintain hot water supply within safety limits with our electronic temperature control system. Each unit is prefabricated for easy integration into new or existing installations, featuring BACnet monitoring and stainless steel mixing valve modulation for precise control.

### NEW YORK & NEW JERSEY LINE CARD

#### FIXTURES

**Duravit**  
High end fixtures, bathroom furniture & accessories.

**Elkay, Halsey Taylor**  
Stainless steel, fireclay & quartz sinks, electric water coolers, bottle filling stations and faucets.

**In-Sink-Erator**  
Food waste disposals, instant hots.

**Just Mfg**  
Full line of commercial drop-in, undermount, and institutional stainless-steel sinks and accessories.

**Mr. Steam**  
Steam bath generators, wireless controls, linear steam heads, towel warmers.

**Niagara**  
Ultra-high efficiency toilets with hydraulic technology.

**Fiat**  
Terrazzo & molded stone bases, mop receptors, laundry tubs, faucets.

**Bemis**  
Toilet seats and bidet seats.

**Bootz**  
Porcelain enameled bathtubs and shower bases & bath/shower walls.

**Fluidmaster**  
Fill valves, connectors, tank levers and flappers.

**Pfister**  
Premier bathroom and kitchen faucets, shower heads, and accessories.

**Stingray**  
Emergency showers, eyewash, face wash and accessories.

**QuickDrain**  
Shower floor solutions, linear shower drains.

**Zurn Fixtures**  
Commercial faucets, flush valves, sensor products, commercial fixtures, & ZurnOne fixture packages, shower valves.

#### HEATING

**Argo Baseboard**  
Finned-Tube baseboard radiators.

**Embassy Industries**  
Traditional baseboard radiation, hydronic kickspace heaters, low temp/ high efficiency baseboard radiation.

**Rheem**  
Commercial and residential water heaters, heat pumps, tankless heaters and more.

**Ruud**  
Tankless, gas, and electric water heaters, heat pumps and other HVAC systems.

**IBC**  
Gas fired wall hung boilers and combis.

**Raypak**  
Commercial boilers, large capacity water heaters, and storage tanks.

**Cross Manifold**  
Motorized, self-contained boiler manifold for radiant and hydronic heat.

**Eemax**  
Tankless water heaters for residential, commercial and industrial applications.

**Ultra-Fin**  
Aluminum fins that attached to pex tubing under the floor joist! Easy radiation.

#### PIPE VALVES & FITTINGS

**Tyler Pipe Co**  
Domestic cast iron soil pipe.

**Greenfield**  
Pipe hangers and plumbing specialties.

**IPEX**  
PVC/CPVC/ABS pipe & fittings, acid waste systems; Blazemaster pipe & fittings.

**Mueller Industries**  
Copper press and sweat fittings and tubing, PVC, specialties.

**Stockham**  
Quality bronze cast iron, cast steel, ball, butterfly, gate & check valves.

**Therm-Omega-Tech**  
Circuit Solver self-adjusting thermostatic balancing valve, drain tempering valves.

#### PLUMBING

**Anaco/Tyler**  
Couplings Domestic no hub couplings, specialty, transition couplings.

**Dab Pumps**  
Pumps and water pressure boosters.

**Floodmaster**  
Plumbing leak detection & automatic shut-off solutions.

**Harris**  
Sterling solder, brazing rods, torch kits.

**Husky Couplings**  
Heavy-duty no hub couplings.

**H2O Degree**  
Sub-metering systems for tenant billing, and building automation.

**Halo**  
Water filtration systems.

**HotBox**  
Heated and non-heated enclosures for backflows and rooftop equipment.

**Lawler**  
Smart digital control & remote monitoring thermostatic mixing valves, high-lo and pou valves.

**Saniflo**  
Above the floor pump systems. Macerating & grinding pumps, acid neutralization, condensate removal.

**Wade Drains**  
Drains, carriers, hydrants, interceptors.

**Oatey/Hercules**  
Laundry & ice boxes, water hammer arrestors, pipe hangers, supports, tub protectors, AAV's, stops valves, plumbing and heating chemicals.

**Zurn Drainage & Wilkins**  
Trench drains, cleanouts, carriers, interceptors, hydrants, floor sinks, backflow preventors, automatic control valves, pressure regulators.

#### TOOLS

**Milwaukee**  
Heavy-duty power tools, hand tools, instruments, and accessories.

# Our Tradition of Excellence Continues

YESTERDAY, TODAY—AND ALWAYS

Generations of loyal customers have relied on Holby Valve for superior products that are made to last.

**For 90 years, our high-performance tempering valve has been the gold standard in our industry.**

Now, our latest product—the HolbyMonitor—continues this tradition of trust and value.

This tech-savvy temperature tracking device delivers invaluable water temperature information so that you can act quickly and decisively when problems arise. You'll have the data in an instant, wherever you are.

Thanks to our commitment to quality, dependability and customer satisfaction, you can rely on the Holby Valve and HolbyMonitor to meet your tempered water needs.

## pH & Lift Station Systems

### Turn-Key & Ready to Use pH Systems:

Pre-engineered for quick installation and operation.

Durable Design:

Built with NEMA 4X enclosures and corrosion-resistant materials.

Compact & Efficient:

Space-saving design with reliable pH control for any operation.

Proven & Guaranteed:

40+ years of success with a 1-year component replacement warranty.

Safe & Flexible:

Custom alarms, chemical containment, and advanced control options.

### Pump Lift Station Systems:

Ready-to-ship solutions for areas without gravity drainage.

Simplex (single pump) and Duplex (dual pump) options.

Corrosion-resistant, temperature-tolerant, with automatic On/Off.

Custom Solutions:

Tailored for your needs.

Flow rates: 1-1,000+ GPM, tanks: 5-15,000 gallons.

Advanced controls, leak detection, and multiple pump types.

# JUNE MEETING MINUTES

The June meeting was initiated by Sean and began with the Pledge of Allegiance, after which, several announcements were made. Eric made a few announcements of upcoming events. There is a tour of the New Croton Reservoir late Spring/early Summer. Details on the date of the tour and how to register will be announced in the future. On Thursday, July 16<sup>th</sup> at 10am, there is a Newtown Creek Wastewater Treatment Plant tour. Details on how to register are on the website. The ASPE summer golf outing is on Monday, August 10<sup>th</sup>. There will be a New York Aquarium family day on a Saturday in the summer. Details on the date will be announced in the future. The Joint Fishing Trip will be on Saturday, September 26<sup>th</sup>. The next AYP event will be on Wednesday, June 24<sup>th</sup> at Barcade Chelsea. The 2026 ASPE Convention and Expo is October 8<sup>th</sup> – 14<sup>th</sup> in Oklahoma City, Oklahoma. Registration is now open and more details can be found at [expo.aspe.org](https://expo.aspe.org).

## **Technical Presentation: The Greatest Decarbonization District: Strategies for Decarbonizing the Largest District Energy System in the U.S & Benefits for a Clean Energy future**

**by Linnea Paton**

The meeting began with an overview of Manhattan's district steam system and its role in New York City's evolving energy landscape. Linnea stated that Manhattan's steam network with 106 miles of steam pipe represents the largest district energy systems in North America and serves many of the city's most prominent institutional, commercial, healthcare, and residential buildings. There roughly 1500 customers in New York City that are served district steam. While district steam has historically relied on fossil fuel generation, the presentation focused on Con Edison's strategy for transforming the existing system into a decarbonized thermal network capable of supporting New York City's carbon emission goals.

Linnea reviewed the regulatory framework driving this transition, including New York's Climate Leadership and Community Protection Act (CLCPA) and New York City Local Law 97. These policies require significant reductions in greenhouse gas emissions over the coming decades and have prompted questions regarding whether widespread building electrification alone can realistically achieve these targets. Rather than viewing steam as an obstacle to decarbonization, Con Edison presented district steam as an existing asset that can be leveraged to reduce emissions while minimizing impacts on the electric grid.

Linnea discussed the challenges associated with full building electrification. Electrifying thousands of existing Manhattan buildings would require substantial upgrades to electrical generation, transmission, and distribution infrastructure. The presentation noted that future electric demand is expected to increase significantly, with New York City projected to require approximately 750 MW of additional peak capacity by 2036 and more than 2,000 MW beyond 2040 as winter electrification loads continue to grow. Maintaining and decarbonizing district steam can alleviate pressure on the electrical system while preserving a reliable thermal energy source.

A major portion of the presentation focused on Con Edison's 2024 Steam Decarbonization Study. The study evaluated multiple pathways to achieve a net-zero steam system by 2050 while coordinating with long-range electric and gas planning efforts. The analysis considered existing infrastructure, available energy resources, technology maturity, projected customer demand, implementation costs, and system resiliency. A total of 24 decarbonization technologies were assessed using a comprehensive scoring methodology, ultimately identifying 12 technologies suitable for inclusion in potential decarbonization pathways.

The recommended near-term strategy centered on three primary technologies: industrial heat pumps, electric boilers, and thermal energy storage (TES). Industrial heat pumps were presented as a promising option capable of extracting heat from low-temperature sources, such as the East River, and upgrading that energy to steam production temperatures. One proposed East River Industrial Heat Pump Project would utilize a 50 MW thermal heat pump system requiring approximately 35 MW of electrical input while producing up to 150 Mlb/hr. The system is expected to achieve a coefficient of performance (COP) of 1.56 or greater. Con Edison has conducted evaluations with multiple manufacturers, including international vendors, with the project carrying an estimated implementation timeline of approximately 4 years and an initial cost estimate of \$146 million.

Electric boilers were also identified as a key near-term decarbonization technology. Unlike heat pumps, electric boilers utilize electricity directly to generate steam and are considered mature, proven technology. The proposed 74th Street Electric Boiler Project would provide approximately 50 MW of thermal output, equivalent to roughly 150 Mlb/hr of continuous steam production. The system would receive power from the 75th Street Substation and would be capable of ramping from standby to full output in approximately 2 minutes, providing valuable operational flexibility. The estimated implementation period is approximately 3 years, with an initial project cost of roughly \$50 million.

The presentation also introduced Con Edison's Low-Carbon Fuels Pilot Program. Through this initiative, renewable natural gas (RNG) and other low-carbon fuel sources would supplement conventional fuel supplies used in steam generation. The presenters estimated that local suppliers within New York City and Westchester County could provide approximately 10% of the steam

system's annual fuel requirements within the next decade, representing approximately 10.9 million dekatherms of fuel displacement. Rather than requiring major infrastructure changes, the program would utilize fuel procurement strategies to reduce lifecycle emissions associated with steam production.

Thermal energy storage emerged as another important component of the decarbonization strategy. TES systems allow electricity to be converted into stored thermal energy during periods of lower demand or greater renewable energy availability. That stored energy can later be discharged to produce industrial-scale steam when needed. The presenters emphasized that TES provides opportunities for load shifting, improves utilization of intermittent renewable generation, and reduces strain on the electrical grid during peak periods.

Several long-term steam decarbonization pathways were subsequently presented. Rather than prescribing a single fixed solution, the study identified multiple pathways that could adapt to future uncertainties involving regulation, customer demand, technological advancement, and renewable energy availability. Regardless of the pathway ultimately pursued, the study consistently identified common near-term investments involving electric boilers, industrial heat pumps, thermal energy storage, and the gradual retirement of existing fossil fuel assets.

The economic implications of district steam decarbonization were a major focus of the presentation. According to the study, decarbonizing the steam system may be 3 to 5 times less expensive than requiring full electrification of steam-served customer buildings. The analysis estimated potential cost avoidance ranging from \$53 billion to \$66 billion, including approximately \$7.6 billion in avoided investments associated with expanding the electric transmission and distribution system. The presenters emphasized that steam decarbonization could provide a more cost-effective compliance pathway for many buildings seeking to meet Local Law 97 emissions targets.

The benefits of retaining district steam extended beyond economics. Steam systems were described as highly resilient infrastructure, currently maintaining reliability levels exceeding 99%. Decarbonized steam could also reduce future winter peak electrical demand while providing opportunities for demand flexibility and load shifting. By producing steam during periods of lower electric demand or higher renewable generation, the system could support more efficient operation of the overall grid.

The presentation further explored the relationship between district steam and building-level technologies. Existing steam customers already utilize steam chillers, including centrifugal, absorption, and hybrid steam-electric systems, which collectively offset more than 100 MW of summer electric peak demand. Linnea noted that even all electric buildings could potentially connect to district steam to reduce both winter and summer electrical peaks without introducing on-site combustion, maintaining compliance with Local Law 154 requirements for new construction.

Linnea then discussed site versus source energy, noting that building efficiency metrics do not always capture broader system impacts. The presenters argued that evaluating source energy and grid-level efficiency provides a more complete understanding of environmental performance, particularly when considering large-scale infrastructure investments and regional generation requirements.

The presentation concluded by outlining Con Edison's projected emissions reductions for the steam system. Based on current forecasts, steam emissions coefficients are expected to decrease by approximately 5% between 2024 and 2029, 26% between 2030 and 2034, 52% between 2035 and 2040, 74% between 2040 and 2045, and the study ultimately projects that Manhattan's district steam system can achieve full net-zero decarbonization by 2050 while supporting Local Law 97 compliance, reducing pressure on the electric grid, and maintaining the resiliency benefits of district energy infrastructure.

Linnea ended the presentation with a question and answer session from the audience.
